

Project Submission Report

1. Title of the Project

The name of my project is “**File Organizer**” which organize the documents and move it in the suitable format based on the extensions.

2. Brief on the project

File Organiser is to arrange all the random files on the PC based on the file extensions, and it will create the generic name folders then the code will drag the files to the respective folders.

3. Deliverables of the project-

A high-level description of the general approach you will use to address the problem. This should include how you will evaluate and what evidence you are planning to gather (e.g. how you can solve the problem through experiments on data)

- List of questions your model/problem are designed to answer
- Details of the model, important findings, expecting observations and outcome

4. Resources

Data set source: The report should also discuss sources of real-world data for your chosen application or how you plan to obtain real-world data. URL of the data set also should include in the report.

Software: Pycharm

5. Personal Details-

Name: - Tannu

E-mail Id: - tannthakur4982@gmail.com

Phone Number: - 8586069785

6. Milestones

Reference for this – Data Science

Milestones
Define a problem
Understanding the business problem
Get the Data
Explore and pre-process data
Choosing the python platform
Create Features
EDA
Create Model
Model Evaluation
Report Writing
